EDUCATION

University of Waterloo

Bachelor of Computer Science, AI Specialization, Entrepreneurship Minor

Courses: Advanced Algorithms, Operating Systems, Data Structures, Object-Oriented Programming, Machine Learning

Sep. 2023 – Present

Waterloo, ON

EXPERIENCE

Conscia AI

Forward Deployed Solutions Engineer

May 2026 – Present

Toronto, ON

- Led end-to-end delivery of Holt Renfrew's product platform (PIM) as the sole technical resource.
- Ran discovery workshops across **4 client teams**, translating conflicting requirements into a scoped delivery plan.
- Authored SoWs, architecture diagrams, and test suites to set scope and expectations with client stakeholders.
- Ingested **1M+ SKUs** via **GraphQL/REST** into a directed graph of taxonomies and variants, applying backpressure and checkpointed retries for rate limits, with JS event-driven transformers propagating updates downstream.
- Integrated SAP and Shopify via webhooks, replacing manual CSV handoffs and cutting **20+ hours** per launch cycle.
- Cut time-to-publish **90%** by automating copywriting, imaging, and AWS Bedrock/SageMaker translation workflows.
- Secured a **full platform corporate license** by pitching the technical solution to Holt Renfrew executives.

Marsh McLennan

Software Developer

Sep. 2025 – Jan. 2026

Toronto, ON

- Architected and shipped a database deployment pipeline across **300 databases** with Git-versioned migrations, CI-gated releases, automated rollback, and HashiCorp Vault secret injection, saving **100+ hours weekly**.
- Ran root cause analysis on platform issues for teams organization-wide, cutting average resolution time by **~2 weeks**.
- Built a TypeScript email classifier on the OpenAI API, embedding cases into MongoDB vector store; **95% accuracy**.
- Won an org-wide security tournament among **1,000+ developers** by remediating hundreds of exposed credentials.

Sun Life

Site Reliability Engineer

Jan. 2025 – Apr. 2025

Toronto, ON

- Automated ticket workflows with Jenkins, Python, and Groovy, cutting manual effort on critical tickets by **95%**.
- Developed an agentic Python assistant with LangGraph for daily tasks, saving each user roughly an hour per week.
- Supported Kubernetes clusters and ServiceNow queues for **100+ teams** org-wide; **99% uptime** on applications.

CIBC

QA Data Analyst

May 2024 – Aug. 2024

Toronto, ON

- Managed test data for a tier-one critical banking application, remediating **2,000+ accounts** and automating QA reporting with VBA, Power Automate, and Power BI dashboards; selected as student coop leader for cohort.

PROJECTS

RepRight | *React, FastAPI, MongoDB, OpenCV, MediaPipe* | [DevPost](#)

- Built an AI lifting form coach scoring technique from live video via pose estimation and LLM-generated feedback.
- Assembled a biomechanics pipeline on MediaPipe and OpenCV, reaching **90%+ precision** on joint-angle detection.
- Served analysis through FastAPI on extracted pose JSON rather than raw video, cutting backend storage by **70%**.

Cadence | *Next.js, TypeScript, Prisma, PostgreSQL, Auth.js, Render* | [GitHub](#)

- Built and deployed a private multi-app platform where paired users track health data, shared calendar events, and wishlists from a single mobile-first PWA, with role-scoped auth isolating each user's data.
- Architected a pnpm monorepo on Next.js and TypeScript with Prisma over PostgreSQL, adding cycle prediction over imported history, automated reminders, and a scraper resolving logged items into purchase links.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Java, C++, Go, SQL, Groovy, YAML, HTML/CSS

AI & Agents: LLM Orchestration, RAG, MCP, Vector Search, PyTorch, LangGraph, Mastra AI, Bedrock, SageMaker

Full Stack: React, Angular, Node.js, Express, FastAPI, Next.js, Prisma, REST, GraphQL, RESTful APIs, Webhooks

Data & Platforms: PostgreSQL, Oracle DB, MongoDB, Conscia DX Engine, SAP, Shopify, Power BI

Infra & Cloud: AWS, Docker, Kubernetes, Jenkins, Git/GitHub, VS Code
